

Growing Together
Where every child matters and is prepared for a future of possibilities...

Relationships and Sex Education Policy

September 2026

1. Aims

The aims of Relationships and Sex Education (RSE) at our school are to:

- Provide a framework in which sensitive discussions can take place
- Prepare pupils for puberty, and give them an understanding of sexual development and the importance of health and hygiene
- Help pupils develop feelings of self-respect, confidence and empathy
- Create a positive culture around issues of sexuality and relationships
- Teach pupils the correct vocabulary to describe themselves and their bodies

RSE also links to our school vision of preparing children for their future by giving them skills for life. Much of the content in our RSE curriculum will skill-up children for the future and provide them with the tools they need in order to live healthy, fulfilled lives.

2. Statutory requirements

As an academy primary school we must provide relationships education to all pupils as per section 34 of the Children and Social work act 2017.

However, we are not required to provide sex education but we do need to teach the elements of sex education contained in the science curriculum.

In teaching RSE, we must have regard to guidance issued by the secretary of state as outlined in section 403 of the Education Act 1996.

3. Policy development

This policy has been developed in consultation with staff, pupils and parents. The consultation and policy development process involved the following steps:

1. Review – The Head teacher (Miss Thornicroft) and the PSHE Leads (Mrs Ashworth and Mrs Jenkinson) gathered together all relevant information including relevant national and local guidance.

2. Staff consultation – all school staff were given the opportunity to look at the policy and PSHE scheme and make recommendations.
3. Parent/stakeholder consultation – an online Google questionnaire was created for parents/guardians to submit their views and ask any questions. This input was then considered when creating the policy.
4. Pupil consultation – we explored what pupils felt they want and need from their RSE lessons.
5. Ratification – once amendments were made, the policy was shared with governors and ratified.

4. Definition

RSE is about the emotional, social and cultural development of pupils, and involves learning about relationships, sexual health, sexuality, healthy lifestyles, diversity and personal identity.

RSE involves a combination of sharing information, and exploring issues and values.

RSE is not about the promotion of sexual activity.

The focus at Springside will be on teaching the fundamental building blocks and characteristics of positive relationships, with particular reference to friendships, family relationships, and relationships with other children and with adults. These areas of learning are taught within the context of the varied family lives and home circumstances of all children. The school does not promote one type of family over another and the information the school provides is fair and impartial.

This starts with pupils being taught about what a relationship is, what friendship is, what family means and who the people are who can support them. Pupils are taught how to take turns, how to treat each other with kindness, consideration and respect, the importance of honesty and truthfulness, permission seeking and giving, and the concept of personal privacy.

The Springside PSHE program also ensures that pupils learn about establishing personal space and boundaries, showing respect and understanding the differences

between appropriate and inappropriate or unsafe physical, and other, contact. Pupils will be taught the knowledge they need to recognise and to report abuse, including emotional, physical and sexual abuse and where to seek advice. Respect for others is taught in an age-appropriate way, in terms of understanding boundaries in play and negotiations about space, toys, books and resources. Pupils are also taught about positive emotional and mental wellbeing.

The importance of positive online relationships are addressed by teachers in a way that is relevant to pupils' lives. Teachers will include content on how information and data is shared and used in all contexts, including online; for example, sharing pictures, understanding that many websites are businesses and how sites may use information provided by users in ways they might not expect.

Teachers will take into account year on year cohorts to ensure that they provide any extra support when needed. For example, if the teacher feels that friendships and relationships are causing difficulty in the class, this would be focused on in a weekly circle time in addition to the timetabled and planned PSHE lessons.

Pupils receive stand-alone sex education sessions delivered by the class teacher. They link directly to the statutory content from the Science curriculum.

The additional sex education lessons provided by the school cover the following topics:

1. Changes during puberty.
2. Different attitudes and values around gender stereotyping and sexuality.
3. Values that are important in relationships.
4. The importance of friendship in intimate relationships.
5. Roles and responsibilities of parents and carers.
6. Personal hygiene.
7. How puberty affects our emotions.
8. Strategies to deal with different feelings within relationships.

The sex education section is delivered in Upper Key Stage 2. This means the children are at their most mature and are in the best position to take on the information they are being given. Parents will be informed prior to these sessions and any questions raised can be fully addressed. Following this, in the days before the sessions are taught, pupils are given a brief outline about the topic and provided the opportunity to consider, and write down confidentially, questions they would like to ask. Primary aged pupils will often ask their teachers or other adults questions related to sex or sexuality which go beyond that which is set out in the school's teaching program. The teacher will then review and decide which questions are appropriate for the cohort and answer them sensitively.

Teachers will take into account year on year cohorts to ensure that they provide any extra support to pupils when needed. The Head teacher may also invite visitors from outside the school, such as school nurses or sexual health professionals, to provide support to staff teaching RSE or alternatively lead the sessions.

Prior to the delivery of the sex education sessions, the parents receive a detailed letter outlining the learning intentions covered.

5. Roles and responsibilities

5.1 The governing board

The governing body will approve the RSE policy, and hold the head teacher to account for its implementation.

The governing board has delegated the approval of this policy to the Full Governing Body.

5.2 The Head teacher

The Head teacher is responsible for ensuring that RSE is taught consistently across the school, and for managing requests to withdraw pupils from [non-statutory/non-science] components of RSE (see section 8).

5.3 Staff

Staff are responsible for:

- Delivering RSE in a sensitive way

- Modelling positive attitudes to RSE
- Monitoring progress
- Responding to the needs of individual pupils
- Responding appropriately to pupils whose parents wish them to be withdrawn from the [non-statutory/non-science] components of RSE

Staff do not have the right to opt out of teaching RSE. Staff who have concerns about teaching RSE are encouraged to discuss this with the Head teacher.

All class teachers have the responsibility for teaching RSE in the school. Delivery is overseen by the Head teacher and the PSHE leads.

New teachers or those who are less confident in delivering the RSE curriculum will be supported by Senior Leaders.

5.4 Pupils

Pupils are expected to engage fully in RSE and, when discussing issues related to RSE, treat others with respect and sensitivity.

6. Parents' right to withdraw

Parents do not have the right to withdraw their children from relationships education.

Parents have the right to withdraw their children from the non-statutory/non-science components of sex education within RSE.

Requests for withdrawal should be put in writing to the Head teacher.

Alternative work will be given to pupils who are withdrawn from sex education.

Springside uses 'Kapow' scheme of work for delivering elements of PSHE and SRE. This scheme clearly identifies the few lessons in which parents can withdraw their children.

7. Monitoring arrangements

The delivery of RSE is monitored by the Head teacher (Miss Thornicroft) and the PSHE leads (Mrs Ashworth and Mrs Jenkinson).

This policy will be reviewed by the Head teacher (Miss Thornicroft) annually. At every review, the policy will be approved by the Full Governing Body.

Signed

A handwritten signature in blue ink, appearing to read 'G Thornicroft', is written over a light blue rectangular background.

G Thornicroft

Head Teacher

Appendix 1

Curriculum Content (Statutory from Sep 26)

Relationships education (Primary)

24. The focus for primary relationships education should be on teaching the skills and knowledge that form the building blocks of all positive relationships, supporting children from the start of their education to grow into kind, caring adults who have respect for others and know how to keep themselves and others safe.

25. Building children's understanding and skills at primary is essential for preparing them for more complex content at secondary. For example, in primary, children will learn skills for managing difficult feelings in their friendships, like disappointment or anger. This prepares them to reflect on how to behave with kindness in more complex or challenging relationships at secondary.

26. Schools should be sensitive to pupils' circumstances, recognising that families of many forms provide a nurturing environment for children, and can include single parent families, same-sex parents, families headed by grandparents, young carers, kinship carers, adoptive parents and foster parents/carers. Teaching should illustrate a wide range of family structures in a positive way, and care should be taken to ensure that children are not stigmatised based on their home circumstances.

27. Primary relationships education should be anchored in an understanding of positive relationships, but should also equip children to keep themselves and others safe, and to recognise and report risks and abuse, including online. This can be delivered by focusing on boundaries, privacy, and children's rights over their own bodies and personal information. Pupils should be able to recognise emotional, physical and sexual abuse. Even very young children can be equipped to understand what counts as abusive behaviour and to trust their instincts about behaviour that doesn't feel right. In addition, pupils should understand about bullying, and that this can include the use of derogatory terms relating to sex, race, disability or sexual orientation.

28. Pupils should know how to report concerns and seek advice. While teaching children how to stay safe, including online, teachers should be clear that being a victim of abuse is never the fault of the child.

29. Primary children should be introduced to protective and preventative content in a way that does not cause unreasonable alarm and does not appear to normalise risky behaviours or activities. For example, in late primary, schools may decide to discuss the 7 8 pressure to share naked images if this is affecting pupils in the school. There may also be cases, such as when they know that pupils have seen pornography, in which schools may feel the need to discuss online sexual content. Teaching should be age appropriate and respectful of all children, including those who may have no familiarity with the topics under discussion. Schools should also inform parents of any deviation from their published RSE policy in advance and share any relevant materials with them on request.

Families and people who care for me

Curriculum content:

1. That families are important for children growing up safe and happy because they can provide love, security and stability.
2. The characteristics of safe and happy family life, such as commitment to each other, including in times of difficulty, protection and care for children and other family members, the importance of spending time together and sharing each other's lives.
3. That the families of other children, either in school or in the wider world, sometimes look different from their family, but that they should respect those differences and know that other children's families are also characterised by love and care.
4. That stable, caring relationships are at the heart of safe and happy families and are important for children's security as they grow up.
5. That marriage and civil partnerships represent a formal and legally recognised commitment of two people to each other which is intended to be lifelong.
6. How to recognise if family relationships are making them feel unhappy or unsafe, and how to seek help or advice from others if needed.

Caring friendships

Curriculum content:

1. How important friendships are in making us feel happy and secure, and how people choose and make friends.
2. That healthy friendships are positive and welcoming towards others, and do not make others feel lonely or excluded. Pupils should learn skills for developing caring, kind friendships.
3. That not every child will have the friends they would like at all times, that most people feel lonely sometimes, and that there is no shame in feeling lonely or talking about it.
4. The characteristics of friendships that lead to happiness and security, including mutual respect, honesty, trustworthiness, loyalty, kindness, generosity, trust, sharing interests and experiences, and support with problems and difficulties.
5. That most friendships have ups and downs, and that these can often be worked through so that the friendship is repaired or even strengthened.
6. How to manage conflict, and that resorting to violence is never right.
7. How to recognise when a friendship is making them feel unhappy or uncomfortable, and how to get support when needed.

Respectful, kind relationships

Curriculum content:

1. How to pay attention to the needs and preferences of others, including in families and friendships. Pupils should be encouraged to discuss how we balance the needs and wishes of different people in relationships and why this can be complicated.
2. The importance of setting and respecting healthy boundaries in relationships with friends, family, peers and adults.
3. How to communicate effectively and manage conflict with kindness and respect; how to be assertive and express needs and boundaries; how to manage feelings, including disappointment and frustration.
4. Pupils should have opportunities to discuss the difference between being assertive and being controlling, and conversely the difference between being kind to other people and neglecting your own needs.
5. That they can expect to be treated with respect by others, and the importance of respecting others, including those who are different (for example, physically, in character, personality or backgrounds), or make different choices, or have different preferences or beliefs.
6. Practical steps they can take and skills they can develop in a range of different contexts to improve or support their relationships.
7. The conventions of courtesy and manners.
8. The importance of self-respect and how this links to their own happiness. Pupils should have opportunities to think about how they foster their own self-esteem and build a strong sense of their own identity, including through developing skills and interests.
9. The different types of bullying (including online bullying), the impact of bullying, responsibilities of bystanders (primarily reporting bullying to an adult), and how to get help.
10. What a stereotype is, how stereotypes can be unfair, negative, destructive or lead to bullying and how to challenge a stereotype.
11. How to seek help when needed, including when they are concerned about violence, harm, or when they are unsure who to trust.

Online safety and awareness

Curriculum content:

1. That people should be respectful in online interactions, and that the same principles apply to online relationships as to face-to-face relationships, including where people are anonymous. For example, the importance of avoiding putting pressure on others to share information and images online, and strategies for resisting peer pressure.
2. How to critically evaluate their online relationships and sources of information, including awareness of the risks associated with people they have never met. For example, that people sometimes behave differently online, including pretending to be someone else, or pretending to be a child, and that this can lead to dangerous situations. How to recognise harmful content or harmful contact, and how to report this.
3. That there is a minimum age for joining social media sites (currently 13), which protects children from inappropriate content or unsafe contact with older social media users, who may be strangers, including other children and adults.
4. The importance of exercising caution about sharing any information about themselves online. Understanding the importance of privacy and location settings to protect information online.
5. Online risks, including that any material provided online might be circulated, and that once a picture or words has been circulated there is no way of deleting it everywhere and no control over where it ends up.
6. That the internet contains a lot of content that can be inappropriate and upsetting for children, and where to go for advice and support when they feel worried or concerned about something they have seen or engaged with online.

Being Safe

Curriculum content:

1. What sorts of boundaries are appropriate in friendships with peers and others (including online). This can include learning about boundaries in play and in negotiations about space, toys, books, resources etc.
2. The concept of privacy and its implications for both children and adults; including that it is not always right to keep secrets if they relate to being safe.
3. That each person's body belongs to them, and the differences between appropriate and inappropriate or unsafe contact, including physical contact.
4. How to respond safely and appropriately to adults they may encounter (in all contexts, including online), including those they do and do not know.
5. How to recognise when a relationship is harmful or dangerous, including skills for recognising who to trust and who not to trust.
6. How to report abuse, concerns about something seen online or experienced in real life, or feelings of being unsafe or feeling bad about any adult and the vocabulary and confidence needed to do so.
7. How to ask for advice or help for themselves or others, and to keep trying until they are heard. Where to get advice e.g. family, school and/or other sources.

Sex Education (Primary)

30. Sex education is not compulsory in primary schools, but we recommend that primaries teach sex education in years 5 and/or 6, in line with content about conception and birth, which forms part of the national curriculum for science. The national curriculum for science includes subject content in related areas, such as the main external body parts, the human body as it grows from birth to old age (including puberty) and reproduction in some plants and animals. Schools may also cover human reproduction in the science curriculum, but where they do so, this should be in line with the factual description of conception in the science curriculum.

31. Primary schools should consult parents about the content of anything that will be taught within sex education. This process should include offering parents support in talking to their children about sex education and how to link this with what is being taught in school as well as advice about parents' right to request withdrawal from sex education.

Health and wellbeing (General)

37. The aim of teaching about health and wellbeing is to enable pupils to make good decisions about their own health and wellbeing, to understand the links between physical and mental health, to recognise when things are not right in their own health or the health of others and to seek support when needed. Schools should support pupils to develop strategies for self-regulation, perseverance and determination, even in the face of setbacks.

38. Effective teaching should aim to reduce stigma attached to health issues, in particular relating to mental health, and discourage the pejorative use of language related to ill health. Schools should promote openness, so that pupils can check their understanding and seek any necessary help and advice.

39. Curriculum content related to puberty and menstruation should be complemented by sensitive arrangements to help girls prepare for and manage menstruation, including with requests for period products. Schools should use appropriate language such as period pads and menstrual products instead of sanitary items or feminine hygiene products. The Department for Education's Period Products Scheme is available for state funded primary schools, secondary schools, and colleges in England.

Health and wellbeing (Primary)

40. Health education in primary starts with the benefits and importance of physical activity, good nutrition and sufficient sleep, and supports pupils to develop emotional awareness. Schools should emphasise the relationships between physical health and mental wellbeing, and the benefits of physical activity and time spent outdoors. As in all of RSHE, care should be taken to avoid exposing pupils to concepts which are not appropriate for them. Schools should continue to build on the primary health and wellbeing curriculum content in secondary.

General wellbeing

Curriculum content:

1. The benefits of physical activity, time outdoors, and helping others for health, wellbeing and happiness. Simple self-care techniques, including the importance of rest, time spent with friends and family, as well as hobbies, interests and community participation.
2. The importance of promoting general wellbeing and physical health.
3. The range and scale of emotions (e.g. happiness, sadness, anger, fear, surprise, nervousness) that they might experience in different situations. Pupils should understand that worrying and feeling down are normal, affect everyone at different times, and are not in themselves a sign of a mental health condition.
4. How to recognise feelings and use varied vocabulary to talk about their own and others' feelings.
5. How to judge whether what they are feeling and how they are behaving is appropriate and proportionate.
6. That isolation and loneliness can affect children, and the benefits of seeking support.
7. That bullying (including cyberbullying) has a negative and often lasting impact on mental wellbeing and how to seek help for themselves or others.
8. That change and loss, including bereavement, can provoke a range of feelings, that grief is a natural response to bereavement, and that everyone grieves differently.
9. Where and how to seek support (including recognising the triggers for seeking support), including who in school they should speak to if they are worried about their own or someone else's mental wellbeing or ability to control their emotions (including issues arising online).
10. That it is common to experience mental health problems, and early support can help.

Wellbeing online

Curriculum content:

1. That for almost everyone the internet is an integral part of life. Pupils should be supported to think about positive and negative aspects of the internet.
2. Pupils should be supported to discuss how online relationships can complement and support meaningful in-person relationships, but also how they might be in tension, and the reasons why online relationships are unlikely to be a good substitute for high quality in-person relationships, looking at the pros and cons of different ways of using online connection.
3. The benefits of limiting time spent online, the risks of excessive time spent on electronic devices and the impact of positive and negative content online on their own and others' mental and physical wellbeing.
4. How to consider the impact of their online behaviour on others, and how to recognise and display respectful behaviour online.
5. Why social media, some apps, computer games and online gaming, including gambling sites, are age restricted.
6. The risks relating to online gaming, video game monetisation, scams, fraud and other financial harms, and that gaming can become addictive.
7. How to take a critical approach to what they see and read online and make responsible decisions about which content, including content on social media and apps, is appropriate for them.
8. That abuse, bullying and harassment can take place online and that this can impact wellbeing. How to seek support from trusted adults.
9. How to understand the information they find online, including from search engines, and know how information is selected and targeted.
10. That they have rights in relation to sharing personal data, privacy and consent.
11. Where and how to report concerns and get support with issues online.

Physical health and fitness

Curriculum content:

1. The characteristics and mental and physical benefits of an active lifestyle.
2. The importance of building regular physical activity into daily and weekly routines and how to achieve this; for example, walking or cycling to school, a daily active mile or other forms of regular, moderate and/or vigorous physical activity.
3. The risks associated with an inactive lifestyle, including obesity.
4. How and when to seek support including which adults to speak to in school if they are worried about their health.

Healthy eating

Curriculum content:

1. What constitutes a healthy diet (including understanding calories and other nutritional content).
2. Understanding the importance of a healthy relationship with food.
3. The principles of planning and preparing a range of healthy meals.
4. The characteristics of a poor diet and risks associated with unhealthy eating (including, for example, obesity and tooth decay) and other behaviours (e.g. the impact of alcohol on diet or health).

Drugs, alcohol, tobacco and vaping

Curriculum content:

1. The facts about legal and illegal harmful substances and associated risks, including smoking, vaping, alcohol use and drug-taking. This should include the risks of nicotine addiction, which are also caused by other nicotine products such as nicotine pouches.

Health protection and prevention

Curriculum content:

1. How to recognise early signs of physical illness, such as weight loss, or unexplained changes to the body.
2. About safe and unsafe exposure to the sun, and how to reduce the risk of sun damage, including skin cancer.
3. The importance of sufficient good quality sleep for health, the amount of sleep recommended for their age, and practical steps for improving sleep, such as not using screens in the bedroom. The impact of poor sleep on weight, mood and ability to learn.
4. About dental health and the benefits of good oral hygiene, including brushing teeth twice a day with fluoride toothpaste, cleaning between teeth, and regular check-ups at the dentist.
5. About personal hygiene and germs including bacteria, viruses, how they are spread and treated, and the importance of handwashing.
6. The facts and scientific evidence relating to vaccination and immunisation. The introduction of topics relating to vaccination and immunisation should be aligned with when vaccinations are offered to pupils.

Personal safety

Curriculum content:

1. About hazards (including fire risks) that may cause harm, injury or risk and ways to reduce risks.
2. How to recognise risk and keep safe around roads, railways, including level crossings, and water, including the water safety code.

Basic first aid

Curriculum content:

1. How to make a clear and efficient call to emergency services if necessary, including the importance of reporting incidents rather than filming them.
2. Concepts of basic first aid, for example dealing with common injuries and ailments, including head injuries.

Developing bodies

Curriculum content:

1. About growth and other ways the body can change and develop, particularly during adolescence. This topic should include the human lifecycle, and puberty should be discussed as a stage in this process.
2. The correct names of body parts, including the penis, vulva, vagina, testicles, scrotum, nipples. Pupils should understand that all of these parts of the body are private and have skills to understand and express their own boundaries around these body parts.
3. The facts about the menstrual cycle, including physical and emotional changes, whilst the average age of the onset of menstruation is twelve, periods can start at eight, so covering this topic before girls' periods start will help them understand what to expect and avoid distress.

Appendix 2

Understanding Relationships and Health Education in your child's primary school: a guide for parents

We want all children to grow up healthy, happy, safe, and able to manage the challenges and opportunities of modern Britain. That is why, from September 2020, all primary age children will be taught Relationships and Health Education.

These subjects are designed to equip your child with knowledge to make informed decisions about their wellbeing, health and relationships as well as preparing them for a successful adult life. The world for all young people looks very different from the way it did 20 years ago when this curriculum was last updated – these changes bring the content into the 21st century, so that it is relevant for your child.

Your child's school will have flexibility to deliver the content in a way that is age and developmentally appropriate and sensitive to the needs and religious background of its pupils.

Relationships Education

Relationships Education will put in place the building blocks needed for positive and safe relationships, including with family, friends and online.

Your child will be taught what a relationship is, what friendship is, what family means and who can support them. In an age-appropriate way, your child's school will cover how to treat each other with kindness, consideration and respect.

By the end of primary school, pupils will have been taught content on:

- families and people who care for me
- caring friendships
- respectful relationships
- online relationships
- being safe

You can find further detail by searching **'relationships and health education'** on GOV.UK.

Health Education

Health Education aims to give your child the information they need to make good decisions about their own health and wellbeing, to recognise issues in themselves and others, and to seek support as early as possible when issues arise.

By the end of primary school, pupils will have been taught content on:

- mental wellbeing
- internet safety and harms
- physical health and fitness
- healthy eating
- facts and risks associated with drugs, alcohol and tobacco
- health and prevention
- basic first aid
- changing adolescent body

You can find further detail by searching **'relationships and health education'** on GOV.UK.

Your rights as a parent

The important lessons you teach your child about healthy relationships, looking after themselves and staying safe, are respected and valued under this new curriculum. Teaching at school will complement and reinforce the lessons you teach your child as they grow up.

Your child's school is required to consult with you when developing and renewing their policies on Relationships Education. These policies must be published online and be available to anybody free of charge.

You can express your opinion, and this will help your child's school decide how and when to cover the content of the statutory guidance. It may also help them decide whether to teach additional non-statutory content. Schools are required to ensure their teaching reflects the age and religious background of their pupils.

Some schools will start to teach these subjects from September 2019 – if you'd like to know more, please speak to your child's school about what they plan to teach.

Right to withdraw your child

You cannot withdraw your child from Relationships Education because it is important that all children receive this content, covering topics such as friendships and how to stay safe.

Your child's primary school can choose to teach Sex Education. If you'd like to know more about this, we recommend speaking to the school to understand what will be taught and when. If you do not want your child to take part in some or all of the lessons on Sex Education, you can ask that they are withdrawn. At primary level, the head teacher must grant this request.

The science curriculum in all maintained schools also includes content on human development, including reproduction, which there is no right to withdraw from.

Department
for Education

If you want to know more about what will be taught as part of the new subjects, the best thing to do is speak to your child's school.
